### TACOMA BRIDGE COLLAPSE.

Tacoma Bridge, Washington, opened only a few months ago, was built at a cost of over six million dollars. But misfortune overtakes the great structure. These are some of the most amazing pictures ever recorded by a newsreel.... the actual collapse of the world's third largest suspension bridge.

Only a 35 mile an hour wind is blowing....but this apparently sets up a rhythmic swinging of the bridge, ~~ng~~ which increases with each swing.

Finally the swinging road and its suspension cables give way, and plunge into the water below. Fortunately the only casualties were a car stalled on the bridge, and a dog.
