

NEW ANTI TANK WEAPONS

A new anti-tank weapon which has been specially designed for use by Home Guardsmen, is demonstrated at an experimental centre.

Its known as the Northover gun, while simplicity of operation is a pronounced advantage, it is designed to project various types of missiles. Watch how it works.

The Northover gun can fire a projectile with great accuracy and can be operated with ease after a minimum of tuition. In every respect the Northover is a splendid anti-tank weapon.
