

AMERICA SIGNS ON.

American Legionnaires march again as the United States calls on all men between the ages of 45 and 64 to register for selective service. Approximately thirteen million men in this age group which embraces all aliens are affected. Colour, Race or Creed is no excuse for non-registration. While this age group is not liable for military service, information about their occupational skill will be of great value in organising America's expanding war production. Mayor La Guardia is among those who sign on.

In Washington, many notable men who frequent the Capitol building fill in their papers, including Mr. Nelson, the War Production chief, and Mr. Roosevelt who, alongside the "Employers", writes "The People of the United States of America". An all-out effort to rocket her war production figures.
