IMP OF THE ICE

Braine

Hope/Kamm, English ice skating wizard. The world amateur champion shows us stunts that astound but which cut no ice with him. Now the skating on stilts which makes it hard, we do it standing on our heads. Hope Braine does it on the steel tips of his skates, spinning like a human top and now still on stilts he weaves a design on the ice. He comes down off his stilts and begins to enjoy it, watch this, it's the ice palais glide, try it in the bathroom next time you tread on the soap. Now he is skating backwards. Hope Braine never falls down on his performance, otherwise he'd be a frozen asset. O.K. Hope, you've had a fair spin at that, now for aerobicic skating. This is what the girls are sipping their iced teas and waiting for. Hold everything the train's arriving at 35 mph. just dropping in at the tea party, try again, not so fast. That's better, so good of you to clear the table. Final sensation, Hope Braine hits the front page, breaks right into the news, that's torn it. Here we go again, the champion breaks yet another record. Anybody with half a brain could do that, Hope hopes so, anyway.
