(6). TITLE.:- AFTER 2,000 YEARS.

Picture.:- Although it has lain at the bottom of Lake Nemi for--
--nearly 2,000 years, this vessel is in an astonishing --
--state of preservation. It is believed to have been the --
--state galley of Caligulus, the "mad" Roman Emperor of A.D.
37 to 41,--
--who was murdered after only four years as ruler of the Empire.

They drained the entire lake to salvage this ancient vessel--

--which is surely the great grandfather of the world's antiques.

There's more than forty tons of it, even after all these years,

--and it's wonderful condition is almost unbelievable. These--
--bronze figures are still so perfect that they might have been made yesterday.

(7). TITLE.:- ETONIANS GO TO THE WALL.

Picture:- This game is peculiar to Eton, and it's rules are so puzzling that some of the players themselves couldn't define them !

They start off with the ball against the wall. Occasionally it is kicked away from the scrum-like tangle,--
--when, back it goes to the wall once more, and the battle starts all over again.

Everything seems to be allowed. If you don't like the other fellow you have a jolly good chance to show it in this game !

There are such things as goals in the game, but, as --
only three have been scored in the last twenty years, they don't amount to much. The match is for half an hour --
--each way; and here's how they feel when it's all over.
