

(7).

TITLE.:- EINSTEIN IN U.S.A.

Picture.:- Here, at least, is one man who can explain Einstein's theory of relativity ! It is Professor Albert Einstein himself ! I hope you are not expecting me to attempt an explanation, for if so, you're --

--doomed to disappointment ! Discussion on the fourth dimension always gives me the feeling that it's "knocking off" --

--time ! The Professor, with his wife, is on his way to Pasadena to compare --

--notes with American scientists. Frau Einstein claims that, though the theory of relativity may be beyond --

--her, she, at least, understands its originator ! What puzzles the Professor more than anything on earth, is why the public are so interested in him !
