TITLE.:- BOTH ENDS MEET.

Picture.:- At long last the two ends of the great bridge--
 --spanning the River Hudson are joined... The ends were --
 --started simultaneously on either shore, and gradually built
 out to --
 --meet each other over mid-river, where these chaps are.

Two men who have been working on opposite ends, meet on
common ground, --

--after three years. For that's how long it took to make --

--both ends meet. Some of us have been trying all our lives
to do that! ...

The whole structure, including approaches, is over two
miles long !.....

The total cost will be nearly fourteen million pounds -
not dollars - when the --

--job's finished... Of course, there's plenty to be done
after the last rivets are in...

Then, it's a case of New York and New Jersey for the
straight and narrow path.
