(3).

TITLE.:- NIAGARA COLLAPSE.

Picture.:- The day before, this part of the famous falls had quite a different aspect.

A straight line up the middle of this picture would show you --

--approximately where the crest of the Falls used to be. ...
Thousands of tons of rock,--

--weakened by the rush of water for centuries, became too frail to carry the weight any longer. ...

The result is that all survey maps of this --

--part of the great Cataract were "out of date" overnight, and will have to be re-drawn !

... However, the Falls are still one of the wonders of the world, and will go --

--on providing visitors with a majestic spectacle and many never-to-be-forgotten thrills! Roll on, Niagara !
