

(2).

TITLE.:- OP TOP OF THE WORLD.

Picture.:- Even the mighty skyscrapers(which have hitherto formed New York's famous skyline) --

--are dwarfed by the new Empire State Building - the world's tallest --

--man-made structure. The President of the owning company --

--gives the signal to open the building, --

--to his little grandchildren Arthur and Mary, --

--and then enters.

This gigantic edifice towers one hundred-and-two floors above the street level.

It's four times the height of our own Big Ben clock tower !

Oh ! I forgot to mention, there are two more floors - below ground !
