

(9).

TITLE.:- LONDON BY LIGHT.

Picture.:- The big lighting organisations have combined to give a brilliant welcome to the world's scientists, --

--who are visiting London to attend the International Illumination Congress, and to --

--celebrate the centenary of Michael Faraday, the "Father of Electricity." After "Big Ben" we go to --

--Trafalgar Square, where the National Gallery presents a picture, on its exterior this time !

London's "guard ship", H.M.S. President, looks like a toy boat, but in the --

--distance is Somerset House. Perhaps some of us will think more kindly of it after this ! One of the --

--grandest sights of all is the Cenotaph in Whitehall, bathed in a radiance worthy of its dignified simplicity.
