THE LUCKIEST SHIP - After 29 years,
the flag of the "Corinthic" is hauled
down for the last time.

-Royal Albert Dock-

Picture.:- Here is the luckiest ship in the world !
She has--

--travelled nearly two million miles, and done the
England-New Zealand trip sixty-seven times. She
also did troop-ship service--

--during the Great War. Yet for all the voyaging--

--and bad weather, she has never had a mishap. School
children are given gifts from portions of--

--her last cargo of butter and cheese.

It is a great farewell. Her flag--

--is down; her last cargo discharged, and she has
now only--

--one more voyage - to the breaking up yards.
