**MONEY TO BURN - Twelve-million-dollar blaze
marks adoption of silverstandard by Mexico.
-Mexico City-**

Picture:- Now witness a dreadful happening ! These bundles of paper which the men are handling--

--as though they didn't mean a thing, are money !

It case you didn't hear me, I'll say it again. It is real--

--money ! Here they are making foot-mats of it to walk over.

And here is the final tragedy ! They are actually throwing thousands of pounds into the furnace--

--for complete destruction. It is all because these are gold notes, and--

--Mexico has now adopted silver as money standard. This bonfire will assist in stabilising--

--the currency. Anyway all that money goes up in smoke.
