RESCUED BY AIRSHIP - Dirigible saves fliers  
marooned in vast swamps of Florida.

-Miami-

Picture.:- This picture is unique ! It shows the actual  
rescue of--

--stranded aeroplane pilots from a--  
--dangerous swamp. The plane was forced down--  
--by a broken throttle--  
--rod. The marsh is deep, and the airship dropped to--  
--the rescue into six feet of--  
--bog grass. For 22 hours the--  
--men suffered from exposure. They were--  
--spotted by--  
--this passing blimp after frantic signalling.

The dirigible's captain decided to--  
--take a chance and go down--  
--for them. No rescuing plane--  
--could land in this waste country, and it was just lucky  
chance that brought the airship--  
--along. However, the --  
--rescue is accomplished without damage, and the marooned  
airmen sail back to--  
--civilization, just glad to be alive ! A real adventure  
with a great finale ! Thanks to the skilful handling of  
the dirigible by her captain and crew ! A fine story !
