

OPENING THE PORT - Coast Guard vessel
masters navigation channel through ice.

-Bangor.U.S.A.-

Picture.:- This ship goes about doing good by smashing things--

--up. She casts her shadow on this--

--ice-bound river of Penobscot, and the smashing starts.
The frost closes--

--this river and its port of Bangor from October until
the Spring, and when--

--this ship opens up the channel--

--again she's very popular. Well,--

--it opens up trade again. She's specially--

--built for the job. Her bows--

--are re-inforced with solid concrete to resist the
terrific--

--pressure of the ice flows, otherwise--

--the ice would smash her. River--

--traffic will soon resume activity and the port--

--traders will get jam on their bread !
