THE FLYING FOX - Sports enthusiasts stage a
novelty fox hunt with petrol-driven mounts.

-Portland.U.S.A.-

Picture.:- The last word in thrills ! Hunting a
human fox by motor cycle ! The fox is given the
lead of eight hunters mounted on thoroughbred--

--steel steeds. He can go where ever--

--he pleases. Water should make the--

--chasers lose the scent. But they're following hard !

The fox picks up the worst spots he can find !

He may not be seen, but it's difficult--

--for him not to be heard. They're on his trail and
off it sometimes, too !

Any minute you may collect--

--a broken neck, but what's a--

--broken neck in a--

--fox hunt ? Hello ! Here's a bundle of scrap--

--iron, and the fox is amongst it !

He should be glad that's finished for one--

--day ! He's clever ! What a head !
