

NEW THAMES BRIDGE. Fine new bridge at Lambeth
inaugurated by His Majesty the King. -London-

Picture.

In a few moments you may cross London's water-way by the---
---new bridge at Lambeth. In a few moments His Their Majesties
the King and Queen will open it for all---
---their people. The King signs the record of---
---it with a golden pen, By electrical contact the pen actually-
---raises the barriers, and the bridge belongs to London. Pre-
ceded by a royal guard, King George drives to the South side of
the river, by the newest thoroughfare. British made throughout
the bridge cost £550,----
---thousand pounds. In erecting^{he} five spans more than four
thousand tons of British steel were used. Its design executed
by Sir Reginald Blomfield, is very graceful and compares
favourably with any of the existing bridges. The structure----
---- is another achievement of which London and its County
Council may be justly proud.
