

SCHOOL FOR "SHOWING OFF" - - Privileged peep
at a class of mannequins-to-be training for forth-
coming fashion parades.

-London-

Picture.:- A peep behind the scenes ! Those ravishing
svelte creatures who move like the "bon temps", but much
more so, and can wear impossible frocks with such an air,
well - - they're not born, - - they're made !

And this is one of the places which accomplishes
the miracle. Exercises of all kinds to develop balance--

--and poise are the routine work of the would-be mannequin.
Notice that easy rippling twist of the waist, followed by
the careless lithe swing of the--

--hips. Oh well, that's how it ought to look ! And the
camera can't lie ! This work is the new profession for
women,--

--but being very pushing, strong silent men have invaded
even this domain, and work while--

--the girls unflex a little.

Engaged girls needn't nervously return the ring
after seeing--

--this. Some of us can wear pyjamas more attractively
than that without--

--training of any sort - - er, I hope !

That ought to be the best--

--piece of news in this story. Anyway modern methods
of salesmanship--

--have created this elegant new profession. So good
luck to good work !
