

SOMETHING NEW I (Number Three).

Another clever idea

put into practical form - - this time, a boon to the lover  
of an early morning cup of tea.

-London-

---

Picture.:- This novelty was invented by a confirmed  
drinker - - er - - of early morning tea. The alarm  
is set, and Milady retires, having said an emotional  
goodnight to the photograph of her favourite film  
hero. After the shortest night on record,--

--she is awakened by the alarm--

--clock. The cocktail party of the night before--

--has left a dry tongue which thirsts for a--

--cup of tea. This bed-side robot prepares--

--without delay, and with as little confast fuss  
as a well-trained butler. Boiling water is now  
in the teapot, and sugar and milk all to hand.  
And what could be nicer--

--than - - er - - that. Ah well nowadays  
there are some luxuries which we can't all afford.
