

5-22/1938

LOOK IN - - SOMETIME ! - - The hospitable phrase takes
on a new meaning as manufacturers prepare glass bricks
for house building.

-Columbus.U.S.A.-

Picture.:- A use has been found for the millions of--
--old milk bottles which are scrapped yearly. The broken
glass is melted down again in--
--a blast furnace working at a heat of--
--two thousand eight hundred degrees, and shaped--
--in hollow glass bricks of six sides--
--
--fused together. This treatment hardens the--
--glass to such an extent that it will with-stand a--
--pressure of no less than--
--forty-five thousand pounds. It--
--is suggested that houses should--
--be built with them. A transparent scheme to supply--
--every neighbour with small talk for the Vivarage tea
parties.
