HELPING MOTHER ! School for teaching very junior students to "do for themselves" inaugurated at Boston.

-U.S.A.-

Picture:- A training school for the world's youngest students !

The starting age--
--is two and the--
--leaving age is four. "How--
--to be happy--
--though clean" is the--
--slogan for these--
--kiddies. The children are--
--led to do--
--everything themselves without being continually checked--
--for not doing--
--it just the right way. They sometimes bend--
--a few plates, but they know--
--how to mop up the evidence of their--
--errors. The system is turning out self--
--reliant tractable babies - - just--
--the kind mother dreams about.
