

CYCLE POLO.

KENT VERSUS EASTERN COUNTIES.

---

Picture.:-

The Kent cycle polo team assembles on this--  
--nice wet day to play Eastern Counties Polo Team.

The sides start from each--  
--end of the field as soon as--  
--the whistle goes. The game is more--  
--popular in France than in England, where matches are--  
--few and far between. The cycles are geared very low,  
about thirty-eight, and consequently  
--are very mobile. I understand that the winners in  
this game will be matched against a continental team--  
--later. That goal dribbling past the post is about--  
--the sixteenth scored. Twenty or thirty are often  
knocked up in a match, and motor cycles knocked down.  
Hence the term--  
--'smashing victory'. Anyway it seems a great game  
of capital interest to cycle makers and serap iron--  
--merchants. Eastern Counties win by fourteen goals  
against twelve.
