

TEMPORARY RAILROAD.

LOCOMOTIVE TAKEN THROUGH STREETS.

---

Picture.:-

Here's rather a curious sight U A perfectly good railway engine--

--being led along the streets of Vienna by--

--a motor lorry. As it passes along, the rails are taken from the--

--back and re-laid in front of the engine. I--

--said it was a perfectly good engine. That's not quite true. It's--

--an old fashioned type, the last of its kind, now--

--pensioned off, and being gently conducted to honourable retirement in the Vienna Museum.

A sort of 'Old faithful, we've rolled the rails together". A veteran--

--slightly weak in the boiler, and rather leaky--

--in the pistons, but with sinews of steel. We now--

--arrive at the Technical Museum, where the monster may be--

--seen free, gratis, and for nothing - children half price.
