(A).

Picture.:- AMERICA : Pictures of the crashed 'plane which killed twelve people.

Parts of the machine were found scattered over a large area, indicating the severity of the disaster.

Prior to this, the dead pilot (nick-named "No Collision Collison") had flown over a million miles without mishap. It is the United Air Line's first accident in 28-million miles.

FRANCE : A new Seine dam is inaugurated at Avallon. It is to protect Paris from flooding. Millions of gallons are pumped from the river into reservoirs during the wet season, and back again when the Seine waters are low. This being an additional method of regularising the levels, and relieving pressure on the Paris reaches of the River.
