

Here is a first glimpse of Comet III --- the forward-looking De Havilland airliner due to go into service in approximately two years' time. It is a thing of beauty --- with an expected performance to match its good looks. It will carry up to seventy-six passengers over stages exceeding two thousand six hundred miles: ~~at a speed of nearly hundreds of miles per hour.~~ ~~It is powered by four jet engines of improved~~

CHARLES AND MARCIANO.

dm
Here is the one-time world heavyweight champion Ezzard Charles --- in training for a come-back fight against Rocky Marciano. His supporters say he is better now than the day he lost the title --- and he's confident he can beat the form book. On the other hand --- this is Rocky Marciano --- the present champion. He's even more certain he can prove to the other side, that a loser never makes a come-back. And how will he do that?

HALF SHIP LAUNCH.

Now from Hamburg in Germany, is half the story of the launching of a ship; and it's not only half a story --- it's half a ship. When complete, it will be a thirty-two thousand-ton oil-tanker --- but owing to lack of space the two halves will be put together in the water. The second half will be joined on in two months' time. In the meanwhile, you have to be mighty careful when you walk through a door marked "exit."

BERLIN VICTORY COLUMN.

Repair work is in progress on the high column in Berlin, which was built to celebrate the German victory in the war of 1870. And while the work was going on our cameraman went aloft and climbed out on to the arm of the goddess --- two hundred and twenty feet above street level. He did this to get better pictures of the goddess's head being examined..... although he didn't know if the arm would bear his weight. Fortunately it did. So now he can have his own head examined.
