

Mr Clement Attlee --- leaving his plane at London Airport with Mrs Attlee --- was greeted by their daughters, and granddaughter Jennifer, after the expensive tour which had included visits to Russia, China, Australia and New Zealand. Mr Attlee had been leading the Labour Party delegation, whose other members were already home

After that personal welcome --- Mr Attlee went into the Conference Room where he was awaited by newsreels and Press Reporters. In reply to questions, *he pointed to Rumora as the daughter* ~~he was outspoken in his views on the present situation in the Far East.~~

And these, are our news-pictures from the flashpoint islands in the Formosa Strait; Dr Wellington Koo --- Nationalist China's Ambassador to Washington --- is touring the islands that lie between the Formosa stronghold of Chiang Kai Shek --- and the mainland of Communist China. Chief of them is Quemoy --- where life goes on between the intermittent bouts of bombardment from Amoy. But --- as the world waits and wonders --- Quemoy ~~land~~ is less a town than a fortress.
